[The Global Macroeconomic Impacts of COVID-19: Seven ...](#)

In order to better understand possible economic outcomes, this paper explores seven different scenarios of how COVID-19 might evolve in the coming year using a modelling technique developed by Lee and McKibbin (2003) and extended by McKibbin and Sidorenko (2006). It examines the impacts of different scenarios on macroeconomic outcomes and financial markets in a global hybrid DSGE/CGE general equilibrium model.

[COVID-19: Implications for business - McKinsey](#)

This article is intended to provide business leaders with a perspective on the evolving situation and implications for their companies. The outbreak is moving quickly, and some of the perspectives in this article may fall rapidly out of date. This article reflects our perspective as of March 25, 2020. We will update it regularly as the outbreak evolves.

[COVID-19 and the world of work: Impact and policy responses](#)

This note offers the ILO's preliminary assessment concerning the possible impacts of COVID-19 on the world of work and proposes a range of policy options to mitigate these impacts and facilitate strong and fast recovery.

[What Coronavirus Could Mean for the Global Economy](#)

Having largely ignored Covid-19 as it spread across China, global financial markets reacted strongly last week when the virus spread to Europe and the Middle East, stoking fears of a global pandemic. Since then, Covid-19 risks have been priced so aggressively across various asset classes that some fear a recession in the global economy may be a foregone conclusion.

[An Economic Pandemic: COVID-19 Recession 2020 | Grant ...](#)

COVID-19 represents an economic pandemic because it is suppressing growth on a global scale. The U.S. is not immune. U.S. growth is poised to slow to a near standstill in the first half as the global economy tanks. The longterm effects could be even greater if it further undermines globalization. Cutting back on trade shrinks the overall size of the economic pie.

[Coronavirus: The world economy at risk - OECD](#)

The coronavirus (COVID-19) outbreak has already brought considerable human suffering and major economic disruption. Output contractions in China are being felt around the world, reflecting the key and rising role China has in global supply chains, travel and commodity markets. Subsequent outbreaks in other economies are having similar effects, albeit on a smaller scale.

[Global trade impact of the Coronavirus - Unctad](#)

Besides its worrying effects on human life, the novel strain of coronavirus (COVID-19) has the potential to significantly slowdown not only the Chinese economy but also the global economy.

China has become the central manufacturing hub of many global business operations. Any disruption of China's output is expected to have repercussions elsewhere through regional and global value chains.

[Policy Steps to Address the Corona Crisis](#)

Monitoring, containing and mitigating the effects of the corona virus are top priorities. Timely and decisive actions by health authorities, central banks, fiscal, regulatory and supervisory authorities can help contain the virus outbreak and offset the economic impact of the pandemic. Central banks must support demand and confidence by preventing a tightening of financial conditions, lowering borrowing costs for households and firms, and ensuring market liquidity.

[The coronavirus shock: a story of another global crisis foretold - what policymakers should be doing about it](#)

The coronavirus crisis is first and foremost a public health threat, but it is also, and increasingly, an economic threat. The so-called "Covid-19" shock will trigger a recession in some countries and a deceleration of global annual growth to below 2.5 per cent -- often taken as the recessionary threshold for the world economy. The resulting hit to global income compared with what forecasters had been projecting for 2020 will be around the trillion-dollar mark; the bigger question is could it be worse?

[Coronavirus: A visual guide to the economic impact - BBC News](#)

Here is a selection of maps and charts to help you understand the economic impact of the virus so far.

[The Economic Impact of the Coronavirus Due to Travel Losses](#)

Oxford Economics, in coordination with its Tourism Economics subsidiary company, modeled the expected downturns in the US travel industry in 2020 as a result of Coronavirus. We then modeled the economic impacts of these travel industry losses in terms of GDP, unemployment, and taxes.

[Economic consequences of a coronavirus \(COVID-19 ...](#)

Despite unprecedented steps to stop the spread of the virus, we began to see disruption to the Chinese economy, and subsequent contagion to other economies as: 1) the movement of people became restricted. 2) supply chains became disrupted.

[The economic effects of COVID-19 around the world - World Economic ...](#)

With more than 395,000 confirmed cases of COVID-19, businesses are coping with lost revenue and disrupted supply chains as factory shutdowns and quarantine measures spread across the globe, restricting movement and business activity. Here are a few ways the outbreak is sending ripples around the world.

Economics in the Time of Covid-19 (ebook)

<https://cepr.org/sites/default/files/news/COVID-19.pdf>

COVID-19 may be as contagious economically as it is medically. **This eBook** addresses some key questions: How, and how far and fast, will the economic damage spread? How bad will it get? How long will the damage last? What are the mechanisms of economic contagion? and, above all, what can governments do about it?

Contenido de este ebook:

Introduction

1. Macroeconomics of the flu
2. Tackling the fallout from COVID-19
3. The economic impact of COVID-19
4. Novel coronavirus hurts the Middle East and North Africa through many channels
5. Thinking ahead about the trade impact of COVID-19
6. Finance in the times of coronavirus Thorsten Beck
7. Contagion: Bank runs and COVID-19
8. Real and financial lenses to assess the economic consequences of COVID-19 81
9. As coronavirus spreads, can the EU afford to close its borders?
10. Trade and travel in the time of epidemics
11. On plague in a time of Ebola
12. Coronavirus monetary policy
13. The economic effects of a pandemic
14. The good thing about coronavirus

II. Dossiers y Estudios (Disponibles en la base de datos: STATISTA)

Coronavirus (COVID-19) in Latin America - Statistics & Facts

This dossier features key information related to the ongoing outbreak of the coronavirus disease (COVID-19) in Latin America. With more than 200 thousand cases confirmed among 155 countries, as well as seven thousand deaths registered in over 45 countries, the COVID-19 outbreak has been declared a global pandemic. This study provides an overview of its impact in Latin America, with data on health expenditures, hospital infrastructure, consumer behavior, and public opinion.

Coronavirus: impact on the tourism industry

This dossier provides some of the most recent data relating to the impact of the ongoing coronavirus disease (COVID-19) pandemic on the global tourism industry. The pandemic, which originated in the Chinese city of Wuhan, has now infected people across the globe. This has had a significant impact on not only those wishing to make use of the tourism industry, but also those working in the industry and even the economies of entire nations. This dossier provides insight into the potential economic impact of the coronavirus on the industry, including information on revenue, spending, employment, bookings, and more.

Coronavirus: impact on media consumption in the U.S.

Statista dossier on the impact of the coronavirus disease (COVID-19) on media consumption in the U.S. This dossier explores the impact of the coronavirus (COVID-19) on media consumption in the United States, offering data on how the U.S. public perceive media coverage of the pandemic, preferred and trusted news sources for updates on the coronavirus, and figures on TV and SVoD viewing, as well as an insight into potential consumer spending as a result of the outbreak.

Coronavirus: impact on the global economy

Statista dossier on the global economic impact of the coronavirus (COVID-19) pandemic

This dossier presents information on the global economic impact of the coronavirus (COVID-19) pandemic. It includes data on the global economic impact and forecasted change in GDP, as well as information on the impact COVID-19 has had on stock markets and on major industries. Also included is regional specific information on the economic impact on Asia, Europe, and the United States.

Coronavirus: impact on the retail landscape in the U.S.

Statista dossier on the impact of the coronavirus on retail, e-commerce, and FMCG in the United States

This dossier provides some of the most recent data relating to the impact of the ongoing coronavirus disease (COVID-19) pandemic on the retail landscape in the United States. Every state in the U.S. has now reported cases of COVID-19 with the number of cases rising every day. In an attempt to slow the spread of the virus many states have now begun to temporarily close schools, bars, restaurants, and movie theaters, ban large public gatherings, and encourage people to work from home. To provide an understanding of the impact of the coronavirus on this sector, the dossier has been broken down into the following chapters: retail overview, edible consumer goods, non-edible consumer goods, e-commerce, store avoidance, spending behavior, and supply chain.

Coronavirus: impact on the automotive industry worldwide

Statista dossier on the impact of COVID-19 on the auto industry worldwide

This dossier aims to shed light on the potential impact of COVID-19 on the automotive industry worldwide. It comprises data on unit sales and trade, including regional specific information on the situation in the United States, Europe, and China.

Coronavirus: impact on financial markets

Statista dossier on the impact of the coronavirus (COVID-19) pandemic on the financial sector

This dossier presents information on the economic impact of the coronavirus (COVID-19) pandemic on the global financial sector. It includes data on the impact COVID-19 has had on stock markets, investment behavior and personal financial plans.

Coronavirus: impact on the sports industry

This dossier provides some of the most recent data relating to the impact of the ongoing coronavirus disease (COVID-19) pandemic on the global sports industry. The pandemic, which originated in the Chinese city of Wuhan, has now infected people across the globe. This dramatic spread has led to sports events across the globe being canceled and many professional leagues being suspended or postponed. This has had a significant impact on not only the fans of these sports, but also those working in the industry and even the economies of entire nations. This dossier provides insight into the potential economic impact of the coronavirus on various sports and events, as well as public opinion on the virus' impact on sport.
